Features:

- User Dashboard & Admin Dashboard
- Admin can create new user
- Every user can send invoice with default template
- In every invoice (user name will be show that who create the invoice)
- User can see only their self created invoice but admin can see and manage all user invoice
- In Main Dashboard user can see their Total amount , Withdraw Amount & remaining amount
- In Main Dashboard user can also see their invoice Total amount ,Total Received Amount & Un-Paid Amount
- User can chat with admin & admin can send message to all user
- Admin can access any user dashboard with one click
- Add manual with draw option (admin will pay cash by self to user) this option is use to adjust remaining amount in user sheet (example in user sheet total amount is 100 and user ask for with draw then admin will withdraw/transfer it and then amount will be deduct from user dashboard according the with draw amount
- Admin can add % to any user total amount (if user will receive 100$ and admin will add 5% charges then remaining user amount will be 95$
