1. Settings page redesign (https://dolsci.com/setting/general-setting)

2. About page redesign (https://dolsci.com/Dolsci/about)
3. Messages page redesign (https://dolsci.com/messages)

4. Post open design

5. Scroll bar is showing in left sidebar
6. Sidebar suggestions redesign
7. Create post redesign
8. Saved posts redesign (https://dolsci.com/saved-posts)
9. Better cropper for profile pic
10. Profile page redesign
11. Explore page redesign

12. Left sidebar is wider everywhere except homepage

13. I want a location filter in explore page. (There will be a location filter in explore page. So people can enhance their searches according to location. Like in fb.)

14. Header add post (+) does not work properly
15. New post icons (like, share, etc)
16. Like issue (getting automatic likes immediately after posting)
17. Asking for location permission everytime after refresh
18. Not mobile optimized design
19. Issue in uploading. Slow
20. Post process is not smooth. New posts show up only after refresh.
21. Remove this. I think its a cookie notice.

6. Remove 'got it". I think it is a cookie message with invisible text or something.
